Role: Quality Assurance Analyst

Start Date : ASAP

Core job description

QA Analyst with proven testing skills is required to assure the quality of solutions delivered by the Development team. Once a project reaches a certain stage of development, it's your role to ensure it works exactly as it should. It'll be up to you to try as best you can to 'break' it!

About Us

We deliver responsive high-performance websites and other desktop software that will move with the demands of our users.

Our clients range from a multi-billion pound asset management firm, to small startup firms. They vary in size and industry as do the platforms we develop on, which will push you to learn new technical and personal skills.

Working environment

Working within an agile environment you will team up with Designers, Developers, Project Managers and Directors to work on projects prioritized by the business. This could be enhancing existing solutions or more strategic Greenfield projects.

Once you understand what the program is meant to be, you'll then carry out tasks such as functional testing, customer scenario testing, stress testing, performance testing and scalability testing.

Responsibilities

- Testing of solutions (functional. scenario, stress, performance, scalability)
- Interact with the project co-ordinator to ensure suitable understanding of requirements
- Design & develop repeatable, automated test cases
- Drive test-driven development practices
- Drive environment best practices
- Accurate time estimations
- Creating/updating any related documentation

Required experience

It's not about the number of years of experience. It's more about your capability and demonstrable experience of:
- Iterative/agile development methodologies
- Exposure to test automation
- Analytical approach to problem solving
- Performance testing (e.g. load testing)
- Good writing skills (for documentation)

Desired experience

- Cross-browser testing
- W3C compliance testing
- Finance industry experience
- SQL

Personal

Very good English communication skills (listening, speaking and writing). Ability to understand requirements given to you and to translate this into your work.

Willingness to learn new skills.
